

# Going beyond video-only telehealth at your child's school

Your child's school clinic just got an exciting upgrade with TytoCare

Doctors can remotely join the visit and look into ears and throat, listen to heart and lungs, and examine the abdomen and skin, providing diagnoses and treatment plans within minutes.

## Our school clinics give you better care

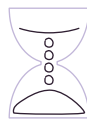

**Doctor examination:** Connect with a remote doctor for an efficient consultation

**Quick diagnoses:** Receive immediate diagnoses and prescriptions at the school clinic

**Live parental view:** Parents can join and observe the examination live

**Save the trip to the doctor:** TytoCare saves time and hassle

## Get your child examined and diagnosed by a doctor right from the school premises.

### How it works

- 1 [The school nurse] will connect with a doctor and perform necessary remote physical exams with their guidance
- 2 The doctor views the clinical data and assesses the condition
- 3 Based on the exams, the doctor can diagnose, give your child a prescription if needed, and even send them back to class

## Our remote doctors can diagnose accurately:

- Ear infection
- Fever and/or chills
- Congestion and/or runny nose
- Cough/wheezing
- Shortness of breath or difficulty breathing
- Rash
- Muscle or body aches
- Headache
- New loss of taste and/or smell
- Nausea or vomiting
- Diarrhea
- Pink eye
